**REGISTRATION FOR SUMMER SCIENCE AND ARTS AT LEARNING  
CIRCLE PRESCHOOL IS UNDERWAY**

**Canton, MA, February 28, 2011** - Learning Circle Preschool, a non-profit school for preschoolers and kindergarteners ages 2.9-7, is now accepting registrations for the 2011 Summer Science and Arts program.

The program lasts six weeks, June 13-July 21, 8:30-12:30 Monday-Thursday. There are both two day and four-day options.

The summer program at Learning Circle Preschool offers enriching experiences that take advantage of the school's location near the Blue Hills Reservation and features a spacious outdoor play area and well-furnished, state-of-the-art classrooms. Elaine Beguerie and Katrina Selawsky, both highly experienced teachers, have developed a creative curriculum with special focus on the creative arts and natural sciences. Small class sizes and individualized attention, a nurturing and safe environment, make Learning Circle a place where children have the time and opportunity to explore and grow.

Each day the program includes time for children to participate in visual arts and music/creative movement classes, small group science and observation experiences, and time for snack, free play activities, and outdoor play.

Registration is on a first come - first serve basis. Please call the Director, Katrina Selawsky, at 781-828-4800 to receive a brochure and to arrange to visit the program. Limited spaces are still available for the summer, as well as in our programs for the fall.
